Art Unit: 3723

The IDS of 12/12/03 lists a "U.S. Patent Application". Inasmuch as patent applications are not prior art this item on the POL-1449 has been lined through by the examiner

Applicant's remarks concerning the restriction requirement have been given careful consideration. Inasmuch as the claimed species have mutually exclusive characteristics they are patentably distinct and it would be a burden on the Office to search all the species. The restriction requirement is deemed proper and is hereby made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-4, 7-11, 13, 16-17, and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Tamm.

Tamm shows an apparatus for guiding wire. The apparatus includes a raceway attachment 26, having a grip, a wire guide 36, and a resilient retainer 34.

Claims 1-3, 6, 8-11, 13, and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Weaver.

Weaver shows an apparatus for guiding wire. The apparatus includes a raceway attachment 30 having a stop and a grip, a wire guide 54, and a retainer 24.

Art Unit: 3723

Claims 5, 12, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 14 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 8/16/05.
